Experience

Zapic • Frontend Lead

September 2025 • Spain

React • TailwindCSS • Zustand • Next.js

- Led the architecture of a social media centralization platform designed to manage account growth through a specialized marketing and audience growth agent.
- Improved optimization and performance of an existing application by implementing memoization strategies and performance analysis, achieving significant improvements in load times and runtime efficiency.
- Designed and implemented a multichannel content distribution architecture based on operational calendars, recurring task processing, configurable availability rules, and real-time publishing mechanisms with integration-specific validations.
- Developed a unified messaging system to centralize interactions from multiple platforms, incorporating real-time event processing, webhook-based automation, bulk operations, dynamic classification, and distributed notification mechanisms.

xFractal • Frontend Develoepr

July 2025 - September 2025 • Dubai

React • TailwindCSS • Zustand • Privy Wallets

- Developed a crypto analysis platform where multiple AI agents operate in parallel, analyzing security, social trends, trading metrics, and market news. Users can interact through a conversational chat interface to obtain comprehensive analyses or execute operations using natural language.
- Implemented a predictive system leveraging machine learning models for 24-hour cryptocurrency price forecasting, real-time social sentiment analysis, and automatic detection of suspicious patterns. Included intelligent scoring (hype, security, trading) for each token.
- Significantly improved application performance and operational efficiency by optimizing data consumption, reducing unnecessary operations, and enhancing session management and authentication flows.

Linktic • Frontend Developer

October 2024 - May 2025 • Colombia

Svelte • TailwindCSS

- Contributed to the development of the accounting module of a fiduciary management platform, participating in the implementation and evolution of core system features.
- Implemented cross-cutting improvements focused on standardization, logic reuse, and maintainability across user, client, and third-party modules.
- Provided technical support and mentorship to junior developers, assisting with development tasks and ongoing application maintenance.

Personal Projects

Whisper

React • TypeScript • Express • MongoDB

- Web application for sharing secrets either publicly (anonymously) or privately between two users, using AES-256-CTR encryption. Implemented an end-to-end encryption system ensuring full message privacy and security.

Pass Keeper

React • TypeScript • Tauri

- Password manager with encryption based on the KDBX format, featuring database synchronization. Developed a secure credential management system and an intuitive interface for centralized, safe credential handling.

Ambient Space

React • TypeScript • UnoCSS

- Tool for creating online study environments with positional audio. Implemented a spatial sound system that allows users to customize their workspace with ambient sounds and 3D effects.

Skills

- **Frontend:** React, TypeScript, HTML, CSS, TailwindCSS.
- **Backend:** Node.js, .NET.
- **Databases:** MongoDB, MySQL, Firebase, Supabase, PostgreSQL.
- **Tools:** Git, Figma, Azure, Postman, Expo.
- **Languages:** Spanish (native), English (working proficiency).
